Access to the audio-description for blind and visually impaired fans

During the 2019/2020 season we have expanded the accessibility to the match event for blind and visually impaired fans: starting from September 2019, fans may listen to the live audio description of AC Milan matches from home through the AC Milan website; a big step forward to guarantee the enjoyment of the Rossoneri home matches for all fans, especially during this season marked by San Siro closed to the public.

More than 100 fans on average connected to AC Milan website to enjoy all the details of what is happening on the pitch from the voice of the journalists at the stadium.
